Objective

Computer Science graduate with a strong foundation in Java, Python, and JavaScript, and working knowledge of React, Node.js, and database design gained through personal projects. Eager to apply my problem-solving skills and technical foundation to an entry-level Software Engineer role, and quick to learn new tools and technologies.

EXPERIENCE

Insza Technology (*Client: WNS Global Services*)

Aug 2025 – Present

Desktop support Engineer L1

Mumbai

- Resolved 15-20 technical support tickets daily while meeting SLA targets.
- Provided priority technical support to senior management and VIP users, ensuring minimal downtime.
- Provided on-site IT support during board meetings and ensured smooth functioning of meeting room systems, projectors, conferencing tools, and audio/video setups.
- Worked efficiently under pressure during high-severity incidents and ensured quick issue resolution within SLA timelines
- Joined client bridge calls and coordinated with internal teams for process application issue resolution.

EDUCATION

University of Mumbai

April 2025

Bachelor of Science in Computer Science | **CGPA: 7.8/10**

Mumbai, India

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming

PROJECTS

[Tic-Tac-TOE: Real-Time Multiplayer Game](#) | [Github](#)

- Built a real-time multiplayer Tic-Tac-Toe game using React, Node.js, Express, and Socket.io with WebSocket-based synchronization.
- Added room-based matchmaking using unique room IDs. The first player to join a room gets "X," the second gets "O," so no manual setup is needed to start a game.
- Handled the turn logic and kept both players' boards in sync in real time over WebSockets, along with a live chat feature so players can talk while they play.
- Built a responsive UI with React and Tailwind, and a lightweight Express backend to manage the Socket.io connections between client and server.

[Doctalk AI: Real-Time AI Medical Voice Agent](#) | [Github](#)

- Built a real-time AI medical voice assistant that allows users to describe symptoms through voice and receive AI-generated responses instantly.
- Implemented speech-to-text functionality using AssemblyAI along with secure user authentication and medical history storage using Clerk and Neon PostgreSQL.
- Designed a modern and fully responsive SaaS-style interface using Next.js and Tailwind CSS for seamless experience across desktop and mobile devices.

SKILLS

- **Languages:** Java, JavaScript, SQL, Python
- **Frontend:** React.js, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Databases:** PostgreSQL, MySQL
- **Tools:** Docker, GitHub Copilot, Vercel, Render, Git, GitHub
